# Products Terminal Expansion

Client: Midstream Company

Location: Texas

Start Date: December 2015 Completion Date: July 2016

Utilizing survey data files of existing property boundaries, and facility infrastructure, Resolute's Civil & Mechanical engineers were tasked with preliminary grassroots layout of a products tank terminal with truck unloading and barge loading capabilities.

#### **RELATED SERVICES AND TASKS**

Considered layout factors such as civil design for site grading cut/fill balance, NFPA tank spacing, facility avoidance, existing access points, and unique property boundaries.

Developed Preliminary PFDs showing pump and line sizing.

Estimated total project costs, and prepared a preliminary project plan.

Prepared a custom geotechnical specification for the unique site geological features, with tank and foundation design in mind.

Siting of tankage and impoundment challenges included accommodating a pipeline corridor and HDD workspace for a channel drill within the tank farm boundary. This required real time communication with multiple client contacts to balance the needs of all parties.
